BUSINESS VOICE

Businesses of all sizes depend on reliable, cost efficient, voice solutions. As voice services continue to migrate to an IP platform, a trusted partner with experience delivering voice services over multiple platforms is a must.

SIP TRUNKING

Home Telecom Business SIP Trunking service combines voice and data over a single connection enabled by our extensive IP network. By connecting our service directly to your IP-PBX, you lower equipment costs and improve the utilization of your network.

Dynamic, Integrated Service - Integrate your voice and data traffic - eliminating the expense of separate networks.

Flexible and Scalable - Meet bandwidth demands with speeds from 1.5 Mbps to 10 Gbps.

Managed Quality of Service (QoS) - Prioritize clear, reliable voice with up to double the amount of calls with compression.

BUSINESS VOICE

VOICE EQUIPMENT/IP READY

Home Telecom combines best-in-class telecommunications equipment with a full suite of networking, communications, and managed services. This unique combination of equipment and service provides an end-to-end solution designed to help your business run more efficiently.

HOSTED VOICE - VOIP

The power of Hosted Business VoIP enables you to put a phone anywhere with an internet connection and have it work seamlessly with the rest of your business. There are no hidden costs – you simply pay a flat rate per phone per month and that's it.

PRI SERVICE

Increase your productivity and connect your employees to local and long distance voice services. We also support inbound Caller ID Name, individual station-level information for outbound Caller ID, 911 calls, and long distance billing, if requested.

BUSINESS CLASS VOICE LINES

We have all of the standard features you need to run an efficient business. Our communication features give your business advanced options such as voicemail with incoming fax capabilities and single number service with simultaneous and sequential ring options.
